

DESIGNED FOR
OPEN PLAN LIVING.

Tasty and Healthy

VITAMIN C increasing by 10%*¹
Stimulates the food manufacturing process (Photosynthesis)

	▶	
Conventional 2011 model (MR-RX62T)		Mitsubishi Electric's Vitamin Factory

VITAMIN FACTORY

Vitamin Factory acts on chlorophyll in vegetables. It stimulates the food manufacturing process (photosynthesis) and increase the vitamin content of vegetables with the ultimate aim of keeping vegetables greener and fresher.

The triple-coloured LED light which help to increase vitamins 1.5 times acts as "miniature sun" to help promote longer-lasting freshness, sustain nutrients and increase vitamins in vegetables.

HUMIDITY CONTROL

The vegetable drawer features humidity controls to regulate the amount of moisture in the crisper.

● EASILY STORE LARGE ITEMS

Large items that cannot fit in before can now be stored easily without having to take food out for arrangements.

● EFFICIENTLY USES THE UPPERMOST AREA

Easy to handle even for petite woman as the shelves can be lowered down easily.

● SECURE SHELF SPACE

A higher space can be achieved without shelf-folding, which allows the smaller shelf to still be used.

3-WAY FLEXISHELF

Our 3-Way flexishelf enables you to easily remove shelves in our refrigerators to accommodate your storing needs.

TEMPERED GLASS SHELF

Every compartment in our refrigerator shares a spacious storage area. Our shelves are made from safety tempered glass. Up to 100kg (max)

Very tough glass shelves can load up to 100kg (max)

DOUBLE ANTI-BACTERIAL FOOD LINER

A silvery inorganic anti-bacterial material, it is used in the inner cabinet of the refrigerator. The material conforms to the Japanese food sanitation law and is harmless to the human body if ingested.

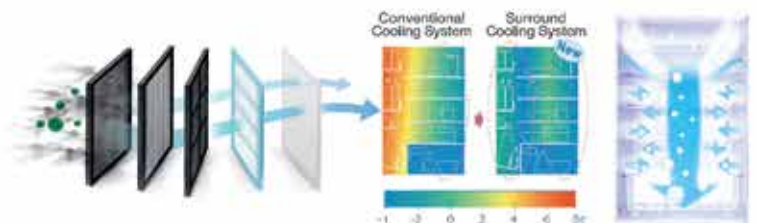

3rd party institute has tested the effects. We started with 340,000 colon bacillus on 2 plastic material. After 24 hours, ordinary plastic gets 11 bacterial but anti-bacteria plastic has only 1,300 bacteria.

SURROUND MULTI AIR-FLOW SYSTEM

Mitsubishi Innovative Surround Multi Air-Flow System distributes uniform cooling air via 6 temperature regulating points in the refrigerator, to all shelves, even hard-to-cool places such as filled door pockets.

The major purpose of MINUS ION is to increase moisture inside the fridge & to preserve nutritional value of food.

THE UNI-GLASS (*for selected models only)

Lighter than glass door and easier to carry if it need of changing position. Plus, it gives the refrigerator a more luxurious image with glossy look.

Feature Multi Fan

Mitsubishi innovative surround multi air-flow system distributes uniform cooling air via 6 temperature regulating points in the refrigerator, to all shelves, even hard-to-cool places such as filled door pockets. Class cool air with Negative-Ion to hinder the growth of bacteria and is emitted from all sides to create surround cooling, keeping food fresh longer.

INTERNAL COOLING FAN

Provides 3 speed cooling levels for both surroundcooling and multi airflow system.

NEURO ELECTRONIC DAMPER

If the temperature in R-room is higher than 30C the damper will automatically open to let the air from F-room flow down to balance the temperature inside R-room. The system is more stable than Thermo Damper.

OUTER FAN

Helps in cooling down compressor heating and making more efficiency operation by using less energy consumption.

MASTER OF TECHNOLOGY

Innovation caters to the lifestyle of new generation with integration of high technology for better efficiency and convenience usage.

MASTER OF DURABILITY

We think, create, and plan for every production. In addition of usage of high quality materials, our products have been long in accepted quality and durable use.

MASTER OF ENERGY SAVING

In Mitsubishi Electric, we are always concerned about the energy saving is not just about help saving cost, but decreases usage of any unnecessary resources.

4 Doors Features

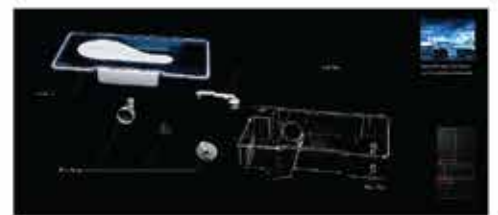

THE NEURO FUZZY SYSTEM

Memorizes the household's usage patterns through various time frames to automatically operate the most optimal conditions by microprocessor. In other words, Neuro Fuzzy can adjust the best operating for your household's usage.

AUTOMATIC ICE MAKER

The non-plumbed automatic ice maker produces a continuous supply of ice cubes with just a simple refilling the water into a separate water tank. It removes the load of having to refill ice trays whenever they get empty. In addition, most the parts can be easily removed for cleaning.

SUPERCOOL CHILLING CASE

With the sub-zero cooling technology, ones could eliminate the constant issue of freezer burn and hassle of defrosting food for food preparation. This feature is designed for storing meat, fish and other perishable foods at the temperature between -3C to 0C, prevents complete freezing and food is ready to cook without the need to defrost it.

ERGONOMIC & SPACIOUS DRAWER DESIGN

Specially Designed To Suit Your Lifestyle

With a more frequent usage of refrigerator compartment in everyday life, the refrigerator compartment is designed to be at the top for easy access and reduces bending of body. The drawer design comes with a dual shelf for extra space of storage, makes organization even easier.

ENERGY EFFICIENCY

Neuro Fuzzy Inverter Technology memories your life patterns while constantly monitors the temperature within the refrigerator. It then will automatically adjust the power and running speed of the compressor accordingly to ensure an optimum and a quieter operation.
